

Bradley A. Stoddard

Director

Office of Michigan's Public Safety Communications System (MPSCS)

Department of Technology, Management, and Budget

Mr. Stoddard holds a BS in Electrical Engineering from Colorado Tech and has been with the State of Michigan for 15 years. He has been the Director of Information Technology for the Michigan State Police, Michigan Department of Military and Veterans Affairs, and the Michigan Department of Transportation before re-joining Michigan's Public Safety Communications System once again as the Director in 2008.

Prior to joining the State, Mr. Stoddard's background included work with the Department of Defense in research and development and for Space and Defense companies. He was one of the elemental electrical engineers responsible for design oversight and construction of Michigan's Public Safety Communications System and also developed Michigan's Criminal Justice Information Network (MiCJIN). Mr. Stoddard has been at the forefront of the nationwide public safety broadband wireless network and is a recognized speaker on public safety communications, applications, and application security.

Mr. Stoddard is the Statewide Interoperability Coordinator (SWIC), is involved in many regional multi-state, national workgroups and organizations, and has advised the National Governor's Association on public safety communications and broadband related planning across the nation.
