Brian Slaughter **Director, Global Public Safety Sales** **General Dynamics C4 Systems**

As a sales director for General Dynamics C4 Systems, Slaughter provides subject matter expertise in technology convergence for customers in both public safety and military markets. His 12-year tenure in training, developing and working with end users gives him an objective view of ‘solution-based’ design that supports their individual mission requirements.

Slaughter is a former U.S. Army Combat Arms Officer and currently serves as an officer in the Army Reserves. During his career Slaughter was responsible for planning and coordinating unit mission parameters and execution; leading soldiers and developing training and sustaining activities.

Slaughter is also co-developer of the Army’s Tactical Ground Reporting or TIGR system, an information-sharing software application that provides data collection and reporting capabilities to users, enabling company and platoon-level personnel to share knowledge. He leveraged his experiences with TIGR and transitioned the software to meet the needs of first responders and public safety personnel.

Prior to joining General Dynamics in 2010, Slaughter worked for Ascend Intelligence where he was one of the original members who developed the TIGR software under the direction of the Defense Advanced Research Projects Agency or DARPA. He was responsible for growing the systems use across the U.S. Army and with NATO allied countries.

Slaughter received a bachelors degree in Finance from the University of Central Florida in Orlando, Fla. and his masters in Business from Loyola University in Chicago, Ill.
