## Leslie Andresen Technical Director, Federal Systems and Cyber Security, C4 Systems

Leslie Andresen is the Technical Director for the Federal Systems and Cyber Solutions division of General Dynamics C4 Systems, located in Needham, Massachusetts. In that role, she is responsible for advancing technological achievements in national security systems, and determines the direction, technology roadmaps, investments and commercial partnerships required to meet the demands of customers chartered with securing critical military, government and infrastructure networks.

Ms. Andresen has more than 25 years of experience in software and systems engineering, cryptography, secure voice and data communications technologies, enterprise security management, and integration of mobile and cloud based solutions. She has led numerous cross-Industry and cross-Government teams supporting the Department of Defense, NATO and the Department of Homeland Security. Most recently, she is leading related efforts for the Comprehensive National Cybersecurity Initiative and the DoD Commercial Solutions for Classified Mobility initiatives, focused on applying cutting edge technologies to meet cyber defense and secure mobility mission needs. Ms. Andresen is bringing her expertise in enterprise security management and trusted computing to the public safety domain, targeting device integrity and assured information sharing.

Ms. Andresen has a Bachelor of Science in Computer Systems Engineering from Rensselaer Polytechnic Institute in Troy, NY, and a Master of Science in Electrical Engineering from Northeastern University in Boston, MA.
