

Greg Najjar
Director, Custom Network Engineering
Sprint

Greg Najjar has worked at Sprint for 17 years and serves as Director, Custom Network Engineering in Reston, VA. In this role, he manages a team of engineers and project managers that are focused on deploying 3G and 4G solutions for Sprint's top Enterprise and Government customers as well as large venues, airports, stadiums and special events such as the NBA All Star Game, Super Bowl, and Presidential Inauguration.

This Engineering team collaborates with customer's technical stakeholders to develop business solutions that will allow them to readily adopt Sprint's advanced technologies and seamlessly integrate them into their operations.

Prior to this role, Greg was Director of Solutions Engineering at Sprint and managed a team of sales engineers focused on selling and implementing wireless voice and data solutions for Sprint's customers in all business segments.

Greg holds a Bachelor of Science degree in Electrical Engineering from Northeastern University in Boston, MA which he received in 1991.
